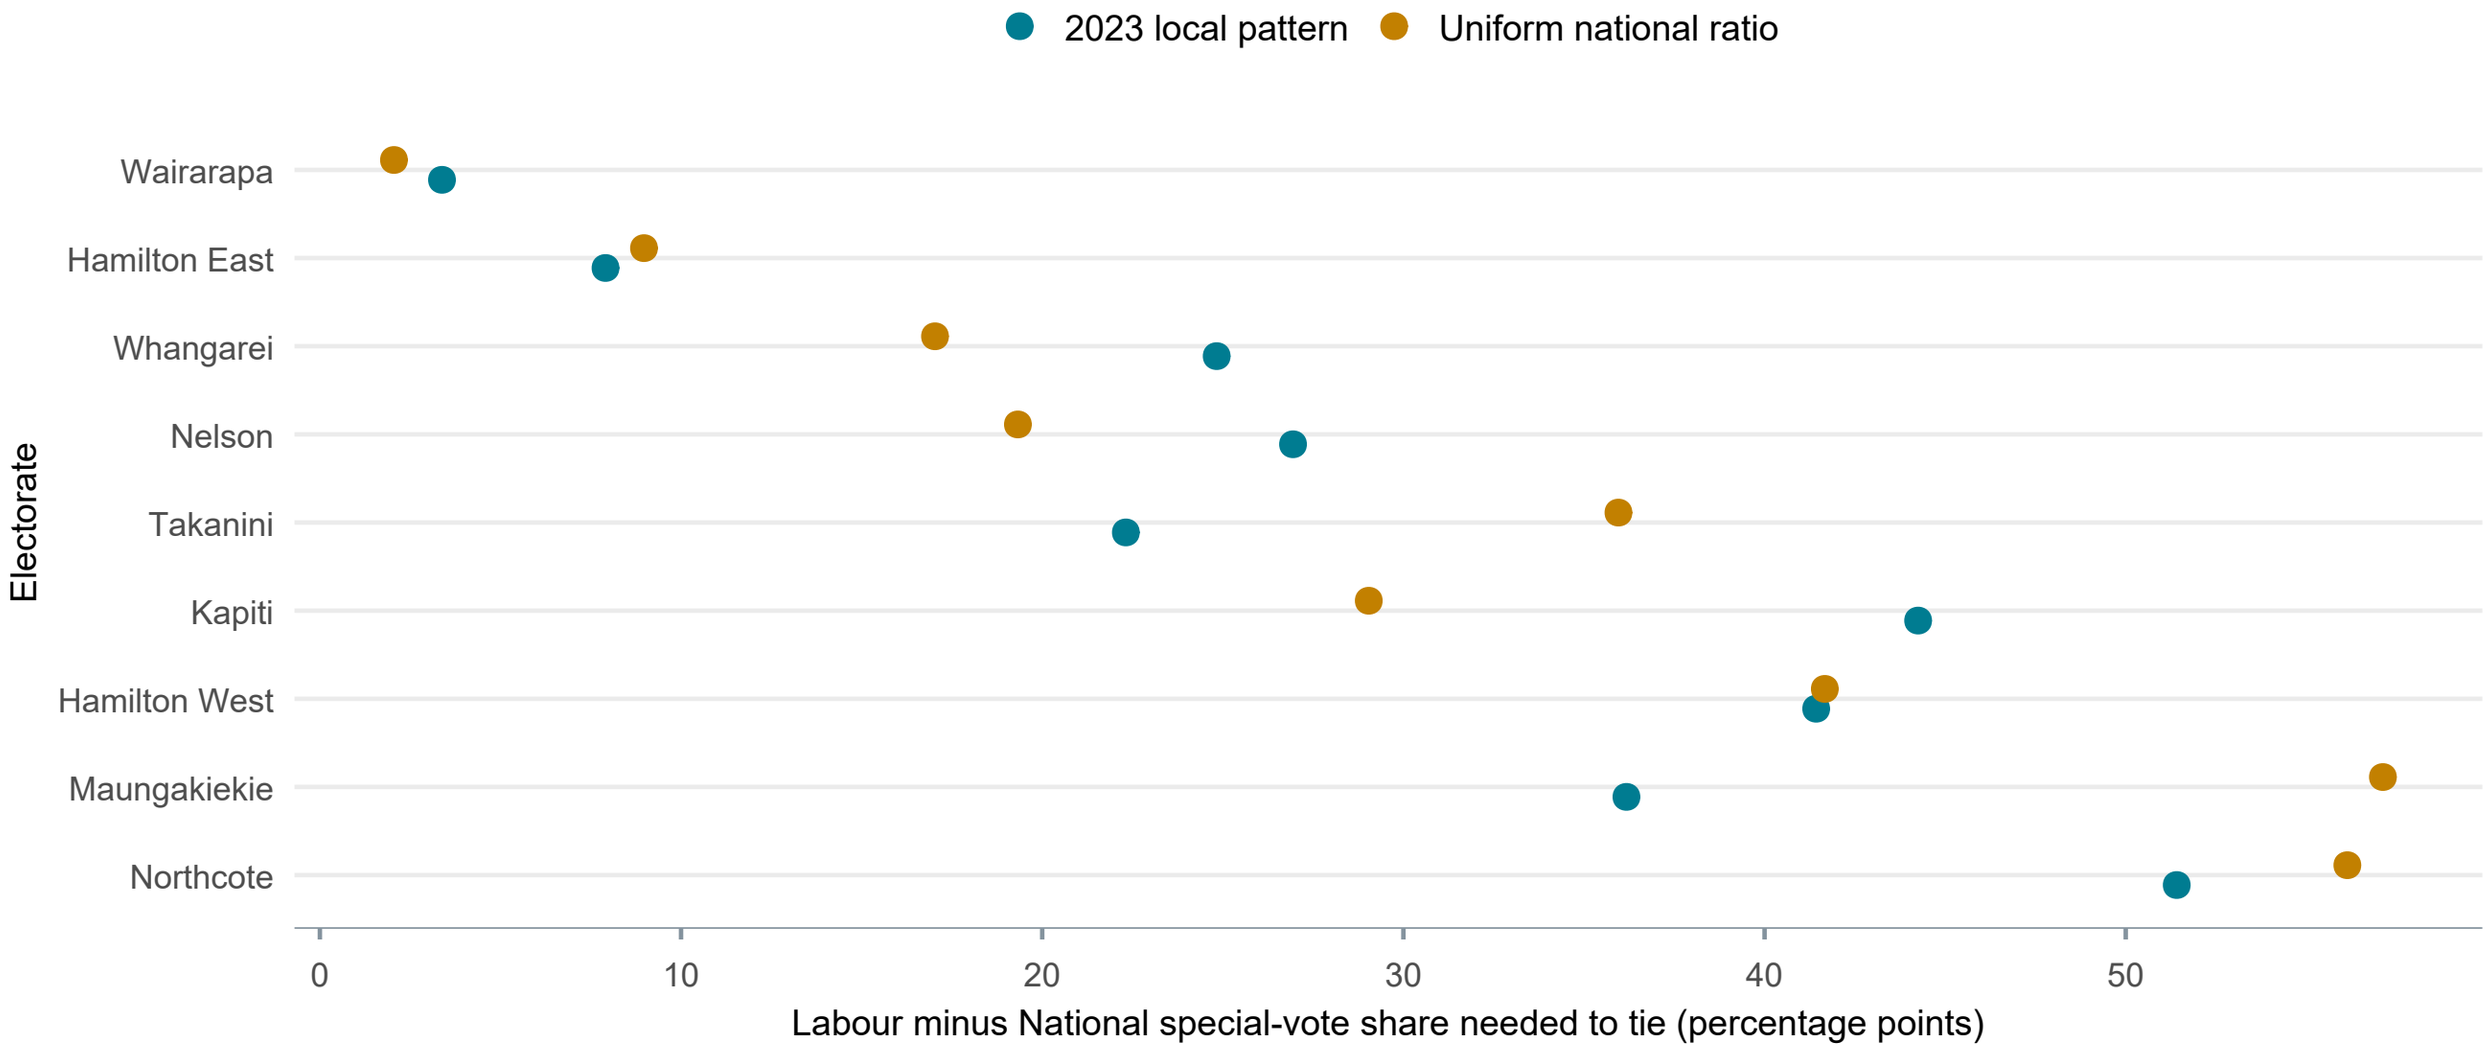
The ranking depends on how many specials each seat has

A high-special-vote electorate can be more vulnerable than its raw lead suggests



Source: Electoral Commission preliminary counts and official 2023 valid-candidate-vote turnout table; own benchmarks.
Both methods use the same national 2026 specials estimate. Neither is an official electorate-level estimate or a forecast.
Historical relative volumes may change with boundaries, enrolment rules, overseas voting and candidate-vote eligibility.
Snapshot: 12 November 2026. Calculations and exact plotted data accompany this chart.
